Professional Profile

User-Centered Product Designer with a decade of experience in design, user research & UAT across Agile startups and global enterprises in mobile, web, automotive & gaming industries

Work Experience

Stellantis **2022 – Current**
UX Performance Lead – HMI Engineer
Global ADAS HMI Lead for Dodge, Jeep, RAM, Maserati, Alfa Romeo and other Stellantis brands & architectures

- Led stakeholder alignment workshops, user research and released global HMI briefs for Speed Control Features, projected to eliminate up to 60% of overspeeding related accidents across the fleet
- Adopted AI to accelerate validation & benchmarking, rank designs through research rather than committee decisions, and map complex engineering problems into user journeys for cross-functional alignment
- Owned ADAS continuous improvement loop that delivered a 30% uplift in UX quality
- Contributed to roadmap planning as ADAS alignment tracking lead
- Oversee feature validation and usability testing to enhance user acceptance

Ubisoft Toronto **2020**
Senior Development Tester

- As PlayStation 5 performance testing lead, achieved 100% of promised performance targets
- Authored comprehensive next-gen tool guides on Confluence

QA InfoTech **2014 – 2019**
Senior User Acceptance Tester (UAT)
Worked as a full-time UAT for multiple clients.

- Led mobile QA for Android & iOS at Hike Messenger, reporting 20% of all bugs and reducing 25% crashes by leveraging analytics for RCA, contributing to its fastest growing unicorn status in India
- Reported highest bugs on JIRA across Adobe's UI localization teams globally
- Created user stories aiding design for ATM monitoring and management platform at ESQ
- Enhanced accessibility of the Emirates website with the help of vision-impaired engineers

Entrepreneurship & Community Projects

- Co-founded MySleepyTale, an AI-powered personalized storytelling platform for children
- Created scalable UI and a style guide for a not-for-profit organization, redesigning admin tools through stakeholder testing and making everyday tasks three times easier
- Supported hospitality entrepreneurs in the Himalayas and Toronto by improving their digital presence, designing experiences that helped local businesses grow their sales up to 4x
- Led 12 VR user research sessions, sharing usability insights with the developer community to advance innovation

Other Interests

- Professional photographer, video editor, and drone pilot, worked with diverse clients including Boston Consulting Group, Nokia and major event companies

Education

Master of Information – User Experience Design **2020 – 2022**
University of Toronto, Canada

Bachelor of Technology – Information Technology **2010 – 2014**
Dr. A.P.J. Abdul Kalam Technical University, India
