Professional Profile

Product designer with 10 years in design, user research and testing across automotive, mobile, web and gaming. As feature lead for Speed Control and Traffic Sign Assist, I design glanceable, safety-critical in-vehicle features, and I prototype with AI from paper sketch to working app.

Work Experience

Stellantis — 2022 to present

UX Performance Lead, HMI Engineer

Global ADAS feature lead for **Dodge**, **Jeep**, **RAM**, **Maserati**, **Alfa Romeo** and other Stellantis brands and architectures. Silent Hero award, Stellantis UX, for my contribution to ADAS design.

- Feature lead for Speed Control features, including Adaptive Cruise Control, Speed Limiter and Speed Limit Assistance, designed to work alongside L2 and L2++ systems; **projected to eliminate up to 60% of overspeeding-related accidents** across the fleet
- Feature lead for Traffic Sign Assist, designing how speed limit information reaches the driver to region-specific requirements and GSR regulations
- Designed glanceable cluster guidance and alerts, with rationale built on user studies, OEM benchmarking and human factors research
- Simplified complex feature logic and flows into graphical, near hi-fi designs using UXD assets years before vehicle launch, aligning engineering, product and design across 14 brands
- Built CoDesigner, an AI proof of concept prototyped with Claude, to show how teams could rank HMI designs on evidence instead of committee decisions; presented at the global UX design review
- Own the ADAS continuous improvement loop that delivered a **30% uplift in UX quality**, and oversee feature validation and usability testing through launch

Ubisoft Toronto — 2020

Senior Development Tester

- As PlayStation 5 performance testing lead, achieved **100% of promised performance targets** and authored next-gen tool guides on Confluence

QA InfoTech — 2014 to 2019

Senior User Acceptance Tester (UAT)

- Led mobile QA for Android and iOS at **Hike Messenger**, reporting 20% of all bugs and **reducing crashes by 25%** through analytics-led root cause analysis, as it became India's **fastest-growing unicorn**
- Reported the most bugs on JIRA across **Adobe**'s global UI localization teams
- Created user stories that shaped the design of an ATM monitoring and management platform at **ESQ**
- Improved the accessibility of the **Emirates** website by testing with vision-impaired engineers

Entrepreneurship and Community Projects

- Co-founded MySleepyTale, an AI storytelling app for children with voice narration, family voice clones and four languages; ran the parent research and built it from paper sketches with AI-native prototyping
- Created a scalable UI and style guide for a not-for-profit, redesigning admin tools through stakeholder testing and making everyday tasks three times easier
- Helped hospitality businesses in the Himalayas and Toronto grow sales up to 4x by improving their digital presence
- Led 12 VR user research sessions and shared usability findings with the developer community

Other Interests

- AI filmmaker, photographer, video editor and drone pilot, for clients including **Boston Consulting Group**, **Nokia** and major event companies

Education

Master of Information, User Experience Design — 2020 to 2022
University of Toronto, Canada

Bachelor of Technology, Information Technology — 2010 to 2014
Dr. A.P.J. Abdul Kalam Technical University, India
